READING A BARE GOLD CHART

One candle, two zones, one trendline, three timeframes. Everything you need is price, and price is all you are going to put on the screen.

ONE CANDLE

A candlestick is one period of price with four facts in it. The body runs from open to close. The wick is the extreme price reached and gave back. That giving-back is the useful part.

FIGURE 1

Schematic. Green and red here mark direction only — in this brand those two colours are reserved for exactly that.

- A long wick into a level with the body closing away from it is a rejection. That is the single most useful candle on a gold chart.
- A big body with almost no wick is momentum. Do not chase it; wait for it to come back.
- Nothing is decided until the candle closes. An open candle is an opinion still being argued.

LEVELS ARE ZONES

Support is a price the market has stopped falling at before. Resistance is a price it has stopped rising at. Neither is a line. Draw them as lines on gold and you will be stopped out by noise, repeatedly, at levels that actually held.

FIGURE 2

Schematic. Mark the zone from the body close to the wick extreme. On gold that is usually 30 to 60 pips wide.

Three states, and only one of them is yours

TREND

Higher highs and higher lows, or lower highs and lower lows. This is where a continuation method earns its money.

RANGE

Two clear zones holding price between them. Tradeable with a different method — not with a trend method.

SIDEWAYS

No structure you can name in ten seconds. This is not a setup waiting to happen; it is a chart to close.

TIMEFRAMES NEST

Timeframes are not alternatives, they are a sequence. Each one has one job, and you only drop down when the one above has done its job.

FIGURE 3

Schematic. Top-down, always in that order. Starting at M15 is how you end up trading against the trend and calling it a scalp.

What goes on the chart

- Price, as candles. Nothing smoothed, nothing averaged.
- Two horizontal zones at most — the one above price and the one below.
- One trendline, if the market has given you three touches for it.
- Nothing else. Every indicator is a lagging opinion about the price you are already looking at.

TWO WAYS IN

Same ranks, two routes. Pick one.

ROUTE A — OPEN AN ACCOUNT UNDER OUR LINK
