# A CLEAN DESK

Four tools, one chart layout, and a long list of things to switch off. A trader's edge is not in the software.

# ONE CHART, THREE LAYOUTS

Save three layouts on XAUUSD — H4, H1, M15 — and never build a fourth. Each carries price, the two zones nearest price, and one trendline if the market has earned it.

FIGURE 1

Schematic. The right-hand chart has more on it and tells you less. Indicators are lagging opinions about the price already in front of you.

## SWITCH OFF

Oscillators stacked under the chart, three moving averages crossing, volume profiles on a broker feed, signal arrows, grids, and anything labelled "pro". None of it survives a spread widening, and all of it gives you a second opinion at the exact moment you needed one decision.

# ***THE CALENDAR RULES THE CLOCK***

Gold reacts to a short list of releases, and the reaction is a spread widening before it is a move. Check the calendar before the session, in MYT, and mark the high-impact times on paper.

## **What to look for**

Interest rate decisions and the statements after them, inflation prints, employment data, and anything with a red marker on a dollar-denominated release.

---

## **The news lockout**

No new entry 30 minutes either side. Positions already open keep their original stop loss — you do not manage them differently because news is coming.

---

## **Why we take the cost**

The lockout will cost you a good trade now and then, and it saves you the spike that jumps your stop loss. We publish the trades it costs us.

# THE FOUR TOOLS

## 01 — POSITION SIZE CALCULATOR

Account balance, 1% risk, stop distance in pips, out comes the lot. A spreadsheet cell does this. Use it before every order, not when the number looks surprising.

## 02 — PRICE ALERTS

Set an alert at the edge of your zone and close the platform. Alerts are how you get your hours back, and screen time is the raw material of boredom trading.

## 03 — JOURNAL

One row per trade, written before the platform closes: setup, risk, stop distance, R closed, and whether you broke a rule. The last field is the one that changes anything.

## 04 — DRAWING TOOLS, TWO OF THEM

A rectangle for zones and a trendline. That is the entire kit. If a drawing tool needs a settings panel, it is not helping you read price.

## TERMINAL ESSENTIALS

Know four things on your platform before you place a live order: where the lot size is set, where the stop loss and take profit are attached to a pending order, where to see the live spread, and where the order history lives. Everything else you can learn later.

- Three saved layouts on gold — H4, H1, M15 — and nothing else.
  - Price, two zones, one trendline. Indicators come off the chart.
  - Calendar checked before the session, high-impact times written down in MYT.
  - Alerts instead of staring. Screen time is what boredom trades are made of.
  - Calculator before the order, journal row before the platform closes.
- 

That is the ground floor covered. The setups themselves, the drills and the demo standard are in the SOP manuals.

TWO WAYS IN

## Same ranks, two routes. Pick one.

### ROUTE A — OPEN AN ACCOUNT UNDER OUR LINK

Malaysia · Singapore · Brunei

[hfm-malaysia.com](https://hfm-malaysia.com)

Indonesia — open a VPN first

[hfmtrade-ind.com](https://hfmtrade-ind.com)

Anywhere else — ask Sam

[t.me/bro\\_sam88](https://t.me/bro_sam88)

### ROUTE B — KEEP YOUR OWN BROKER

Stay where you are and enlist directly. Your money stays in your own account either way, and the ranks are the same on both routes.

---

### RISK WARNING

Trading gold, forex and CFDs on margin carries a high level of risk and you could lose more than your initial deposit. 70–80% of retail investor accounts lose money when trading CFDs. Past performance is not indicative of future results. All content is for education only and is not financial advice.

### EDUCATION ONLY
